

ANALYSIS OF ASSOCIATIONAL NETWORKS EMBEDDED IN TERRORIST EVENTS

Joe Kavanaugh, Juliana Lilly, Hasan Arslan, John Miller

June 14, 2008

OVERVIEW

Clustering of terrorist groups from around the world showed strong similarities as well as differences.

METHODOLOGY

FINDINGS

The hierarchical clustering resulting from this analysis based on TTP was shown to be strongly correlated to both geography and group motivation.

FUTURE RESEARCH

Further refinements in the techniques and data dimensions must be conducted to validate the approach.

INSTITUTE FOR THE STUDY OF VIOLENT GROUPS
